SUMMARY

Versatile Software Engineer with a B.Tech in Computer Science and Engineering, specializing in back-end and full-stack development. Proven expertise in building production-level applications using Python, FastAPI, Next.js, NoSQL , & PostgreSQL. Demonstrated ability to integrate advanced frameworks to deliver scalable, high-performance web systems.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript
Backend: Node.js, Express, FastAPI, WebSockets
Frontend: React, Next.js, CSS
Data & ML: PostgreSQL, MongoDB, OpenCV, Pandas
Tools: Docker, Git & GitHub, CI/CD, Pytest, Claude Code, OpenAI Codex

PROJECTS

ACFM-Net: Real-Time Fatigue Monitoring (github.com/himanshu-raj-sharma/ACFM-System)

Python, PyTorch, OpenCV, FastAPI, React, WebSockets

- Engineered a real-time computer vision pipeline utilizing OpenCV and MediaPipe to process webcam frames, extracting critical eye and face features with sub-100ms end-to-end inference using an LSTM-based alertness classifier.
- Developed and deployed robust back-end and front-end interfaces integrating FastAPI and React, incorporating essential features like camera consent management and a comprehensive suite of automated tests.
- Designed and implemented an end-to-end fatigue monitoring system leveraging PyTorch and FastAPI, delivering highly responsive alertness classification and demonstrating strong full-stack development skills.

Punyakart Foundation: A NGO Donation Platform (punyakart.com)

MongoDB, Express, React, Node.js

- Developed robust donation APIs integrated with Razorpay for secure payment processing and streamlined the 80G certificate workflow for donors.
- Implemented comprehensive backend validation and managed PostgreSQL migrations to ensure data integrity and seamless deployment.
- Integrated email and WhatsApp notifications to enhance donor engagement and provide real-time transaction updates.

EXPERIENCE

Full Stack Web Developer, Shailvika Livings. (2026 – Present)

- Collaborated with stakeholders to define and deliver full-stack features, API integrations, and deployments meeting specific project requirements.
- Architected and developed diverse full-stack web applications from the ground up, utilizing modern front-end and back-end technologies
- Streamlined deployment processes and integrated APIs, enhancing the overall functionality and performance of web applications.

EDUCATION

B.Tech, Computer Science Engineering, DIT University, Dehradun. (2023 – 2026)
Diploma, Electronics Engineering, Government Polytechnic College, Gaya. (2019 – 2022)

CERTIFICATIONS

IBM: Docker, Kubernetes & OpenShift; Python for Data Science, AI & Development; Cybersecurity Essentials; Relational Databases (RDBMS)
LearnQuest: Introduction to Java; Java Enterprise Edition (EE); Cloud Computing Basics (Cloud 101); Cisco Networking Basics
University of Maryland: Entrepreneurship Specialization: Launching an Innovative Business; Entrepreneurship Capstone; Developing Innovative Ideas for New Companies; Innovation for Entrepreneurs; New Venture Finance
Other: Blockchain Basics (University at Buffalo); Command Line Basics in Linux (Coursera)
